PERSONAL INFORMATION

Date of Birth : 24/06/1998

Nationality : Zambian

WORK HISTORY

Twenshe

02/2022 - 05/2022

Software developer

Part time software developer.

Wrote clean, clear and well-tested code for a few projects.

Ensured bug reports were remedied, handling all associated issues promptly and effectively.

Deployed new front-end features, capturing higher performance metrics than previous averages.

Adapted current software platforms to incorporate new functionality or improve security.

Produced clean, error-free code in line with internal quality standards.

Learned new coding languages and development frameworks to serve needs of changing development program.

West Line Auto

03/2020 - 09/2020

Data Entry

Reduced transaction time from about two mins to less than a minute.

Developed and maintained a database system that stored information of all the transactions that take place.

Managed customer orders and invoices(this is due to the fact that I was also a sales assistant).

Transferred all hard copies of past transaction into an electronic format

Managed all the transactions that took place from phone calls.

Welcomed clients in upbeat and friendly manner.

EDUCATION

06/2022	**ZCAS University** Bachelor of Business Computing This degree in business computing, taught me how computing and information systems fit into business structures and functions, and how computer systems are developed. I learnt how to design and build IT systems using database design and software development techniques. and gained the skills to design and build systems to meet modern business needs
12/2016	**Matero Boys Secondary School** Grade 12 certificate- O'level
